

## VacClean™ Contact Web Cleaning System

**Product Code:** VacClean™

The Meech VacClean™ contact web cleaning system is an evolution of Meech's successful Tornado system, of which there are hundreds of installations globally. VacClean systems incorporate an enhanced contact cleaning manifold with either an Air Handling Unit (AHU) or vacuum fan unit, depending on the installation environment and web width.

### Features

Twin AC ionising bars

Highly polished stainless steel faceplates

Brushes

### Benefits

Neutralise static charges on the web on entry and exit to the manifold

Create turbulence to break the boundary layer

Aid break up of the boundary layer without contacting the web surface

### Technical Characteristics

Single or double sided

Both

Filtration

F8 media efficient to 90-95% at 0.4 micron, washable filter

Compact web contact point

VacClean can be installed in areas with restricted space

Extraction model

Air handling unit or vacuum fan unit
